Summary

Android Developer with 1+ year of experience building production-grade mobile applications in **Kotlin**, **Jetpack Compose**, and **Flutter** using **MVVM** and **Clean Architecture**. Delivered real-time features (**WebSockets**, live map tracking) and **RESTful API** integrations across automotive infotainment, ride-hailing, and enterprise mobile products, with hands-on backend development in **Node.js/Express** and a focus on clean, testable code.

Technical Skills

Languages: Kotlin, Java, Dart, SQL, JavaScript, Python

Android Development: Jetpack Compose, Dagger/Hilt, Retrofit, Room DB, Firebase, MVVM, Clean Architecture

Cross-Platform: Flutter, Bloc, Dio, Google Maps API

Backend & Cloud: Node.js, Express, MongoDB, REST APIs, AWS, Azure

Tools & Practices: WebSockets, Real-time Systems, LLM Integration, Git, CI/CD, Unit Testing, Agile/Scrum

Experience

Intelliod

Software Development Engineer

Visakhapatnam

Aug 2025 – Present

- Engineer production **Android applications** using **Kotlin** and **Jetpack Compose**, following clean, testable architecture principles.
- Build and maintain backend **REST APIs** in **Node.js/Express**, consumed directly by Android clients to ensure reliable end-to-end data flow.

ShankhTech

Software Development Engineer

Bangalore

Apr 2025 – Aug 2025

- Architected **Rider and Driver mobile apps** in **Flutter**, featuring real-time map tracking with animated live-location markers.
- Integrated **REST APIs** and **WebSockets** to keep live location and booking data synchronized across both apps.

Wipro

Project Engineer

Bangalore

Feb 2025 – Jun 2025

- Enhanced native UI components for the **Ford in-car infotainment system (Android)**, improving interface responsiveness and driver experience.
- Implemented Android app customization aligned to **automotive industry standards**, reducing integration issues identified during QA cycles.

Projects

Lexsyra | [Visit Website](#) | Node.js, Express, MongoDB, Socket.io

Jan 2026 – Present

- Build an **AI-powered tutoring platform** with real-time roleplay sessions (Socket.io + Claude AI) and live transcription, running on a concurrency-safe save queue.
- Engineer a **multi-tenant, dual-database architecture** with dynamic model resolution that supports auto-generated lesson decks and rubric-based assessment grading.

MIFTAH AI | [Visit Website](#) | Kotlin, Jetpack Compose

Aug 2025 – Jan 2026

- Developed a travel and lifestyle **Android app** to discover and book hotels, restaurants, events, and leisure activities with a seamless mobile experience.
- Integrated an **AI-powered assistant** for personalized recommendations, trip planning, and booking support based on user preferences.

Transit | Flutter, Dio, Google Maps API, WebSockets

April 2025

- Built feature-rich **Rider and Driver apps** with real-time driver tracking, animated map movement, and dynamic booking statuses.
- Used **WebSockets** for live updates and **Dio** for API integration, following clean architecture for a modular codebase.

Factory Process Management App | Flutter, Dio, REST APIs

July 2025

- Built a custom mobile app enabling factory teams to track job progress with real-time status updates on ongoing operations.
- Created a modular, scalable UI using clean architecture for seamless data flow from backend APIs.

Education

Bachelor of Technology in Computer Science & Engineering

Gandhi Institute of Engineering and Technology, Gunupur, Odisha

Sep 2020 – Apr 2024, CGPA: 8.6

Certifications

Salesforce Developer Virtual Internship (Superset Badges) | Salesforce Certified AI Associate | Java Full Stack Certification (Wipro) | [View Certificate](#)
